
Air & Gas Technologies, Inc. Announces Completion of a Liquid/Compressed Natural Gas Fueling Station at Enviro Express Natural Gas, LLC. , Bridgeport, CT.

American Recovery and Reinvestment Act Funds through the U.S. Department of Energy Assist the Hauling Company to Convert Fleet of Heavy-Duty Tractors to LNG Operation.

Cliffwood Beach, NJ, October, 2010 – Air & Gas Technologies (AGT) of Cliffwood Beach, NJ announce the completion of construction and installation of a Liquid/Compressed Natural Gas (L/CNG) fueling station for Enviro Express Natural Gas, LLC (Enviro) of Bridgeport, CT. ***This will be the first station of its kind east of the Mississippi.***

Through the “*Connecticut Clean Cities Future Fuels Project*,” Enviro partnered with the Greater New Haven Clean Cities Coalition, Inc., in association with Clean Cities of Southwestern Connecticut to receive a U.S. Department of Energy Clean Cities Award, which is funded by the American Recovery and Reinvestment Act of 2009. For more information about the project, please visit www.ct-futurefuels.com.

With this assistance, Enviro has purchased 18 new heavy-duty Kenworth LNG tractors as replacement for a majority of its existing diesel fleet. Additionally, Air & Gas Technologies, in conjunction with NorthStar LNG, of Evanston, WY have constructed a state of the art on-site fueling station to dispense LNG to Enviro’s fleet of tractors, as well as provide public access CNG fueling. Through the project, Enviro will also fuel four heavy-duty dump trucks which the City of Bridgeport will re-power with CNG engines with assistance from the same award.

The benefits of natural gas are abundant. Natural gas is a greener alternative fuel that is commercially viable, environmentally friendly and sustainable. For each Enviro diesel vehicle replaced, an estimated 28,571 gallons of petroleum will be displaced annually. Harmful particulate emissions will be reduced by 38,000 pounds annually, and due to the lighter weight of LNG fuel, individual tractor payload will be increased by 1000 pounds.

About Air & Gas Technologies, Inc.

Air & Gas Technologies is a New Jersey based company providing design, installation and maintenance of natural gas fueling stations. For more information, contact Vince Tomasso (vtomasso@airgastech.com) or Brian Keelen (bkeelen@airgastech.com) at 800-716-5550. In Connecticut, contact Graham Barker (grahambarker@earthlink.net) at 203-374-1795 or visit www.airgastech.com.
